**SPECIFICATIONS**

- **Input:** 18V
- **Bar Length:** 200mm
- **Cutting Length Max.:** 170mm
- **Chain Speed:** 3.76m/s
- **Oil Tank Capacity:** 125ml
- **Length:** 1.83 - 2.77m
- **Weight (without battery):** 3.9kg

---

**WHAT’S IN THE BOX**

- Pole
- Chain
- Guide Bar
- Guide Bar Cover
- Rear Handle
- Pruner Head
- Shoulder Strap
- Auxiliary Handle

---

**WARRANTY**

All of our products undergo strict quality checks to ensure that they reach you in perfect condition. In the unlikely event that your device develops a fault, please contact our service department at the address shown on this guarantee card. You can also contact us by telephone using the customer service number shown. Please note the following terms under which guarantee claims can be made:

1. These warranty terms regulate additional warranty services, which the manufacturer mentioned below promises to buyers of its new products in addition to their statutory guarantee claims and are not affected by this guarantee. Our guarantee is free of charge to you.

2. The warranty services only covers defects due to material or manufacturing faults on a product which you have bought from the manufacturer mentioned below are limited to either the rectification of said defects on the product or the replacement of the product, whichever we prefer.

   Please note that our devices are not designed for use in commercial, trade or professional applications. A guarantee contract will not be created if the device has been used by commercial, trade or industrial business or has been exposed to similar stresses during the guarantee period.

   - Damage to the device caused by a failure to follow the assembly instructions or due to incorrect installation, a failure to follow the operating instructions (for example connecting it to an incorrect mains voltage or current type) or a failure to follow the maintenance and safety instructions or by exposing the device to abnormal environmental conditions or by lack of care and maintenance.
   - Damage to the device caused by abuse or incorrect use (for example overloading the device or the use or unapproved tools or accessories), ingress of foreign bodies into the device (such as sand, stones or dust, transport damage), the use of force or damage caused by external forces (for example by dropping it).
   - Damage to the device or parts of the device caused by normal or natural wear or tear or by normal use of the device.

3. The following are not covered by our guarantee:

   - Damage to the device caused by a failure to follow the assembly instructions or due to incorrect installation, a failure to follow the operating instructions (for example connecting it to an incorrect mains voltage or current type) or a failure to follow the maintenance and safety instructions or by exposing the device to abnormal environmental conditions or by lack of care and maintenance.
   - Damage to the device caused by abuse or incorrect use (for example overloading the device or the use or unapproved tools or accessories), ingress of foreign bodies into the device (such as sand, stones or dust, transport damage), the use of force or damage caused by external forces (for example by dropping it).
   - Damage to the device or parts of the device caused by normal or natural wear or tear or by normal use of the device.

4. Your Product is guaranteed for a period of 60 months from the original date of purchase and is intended for DIY (Do It Yourself) use only. Lithium Ion batteries and chargers are covered by a 12 month warranty. Warranty excludes consumable parts. Guarantee claims should be submitted before the end of the guarantee period within two weeks of the defect being noticed. No guarantee claims will be accepted after the end of the guarantee period.

   The original guarantee period remains applicable to the device even if repairs are carried out or parts are replaced. In such cases, the work performed or parts fitted will not result in an extension of the guarantee period, and no new guarantee will become active for the work performed or parts fitted. This also applies if an on-site service is used.

   IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO THE PLACE OF PURCHASE WITH YOUR REGISTER RECEIPT.

   Please refer to the restrictions of this warranty concerning wearing parts, consumables and missing parts as set out in the service information in these operating instructions.

0816
1. **ASSEMBLY**

**CAUTION:** ENSURE THE TOOL IS OFF & THE BATTERY REMOVED BEFORE PERFORMING ANY OF THE FOLLOWING OPERATIONS.

**Fitting Rear Handle**

1. Push the rear handle fully onto tube aligning the internal prongs.
2. Screw tight with the assembly nut.

**Fitting Auxiliary Handle**

1. Place the Auxiliary Handle onto the mounting attachment.
2. Pass the bolt through the auxiliary handle and screw the lever to the end of the bolt.
3. Select the most comfortable position and close the lever to lock the auxiliary handle in position.
2. TENSIONING THE CHAIN

CAUTION: THE CHAIN HAS SHARP EDGES. FOR YOUR OWN SAFETY, PLEASE WEAR WORK GLOVES.

Fitting Pruner Head

1. Align the pruner head and the motor head so the arrows on both coincide.

2. (a) Press the pruner head against the motor head. This will cause the lock button to be pushed to the right.
   (b) Turn the pruner head clockwise. The pruner head will lock onto the motor head and is then secured in place.

Note: The Lock Button will “CLICK” back to the left (original position) when the pruner head is correctly secured in place.

Fitting Guide Bar & Chain

1. Loosen the chain cover lock and remove the side cover.

CAUTION: THE CHAIN HAS SHARP EDGES. FOR YOUR OWN SAFETY, PLEASE WEAR WORK GLOVES.

2. Place the chain in the groove of the guide bar as shown. Refer to the image printed on the guide bar that indicates the direction that the chain should face.

IMPORTANT: IF THE CHAIN IS INSTALLED BACKWARDS (CHAIN CUTTERS ARE FACING IN THE OPPOSITE DIRECTION OF ROTATION) THE POLE PRUNER WILL VIBRATE EXCESSIVELY AND NOT CUT.

3. Place onto the mount, ensuring that the chain sits around the chain sprocket.

4. Re-mount and finger-tighten the side cover with the chain cover lock.

Note: Only tighten the chain cover locking knob securely once the chain tension has been adjusted (see: Tensioning the chain.)
### 3. OIL

**IMPORTANT:** ONLY USE OIL THAT IS EXPRESSLY LABELLED “CHAIN BAR OIL”.

1. Remove the chain bar oil cap.
2. Fill the tank with chain bar oil. The capacity of the chain oil tank is 125ml. Do not over fill.
3. Refit cap and clean any oil spillage.
4. Always fill oil tank when the oil level is below the minimum mark on the oil level window.

**WARNING:** NEVER START WORK UNLESS THE CHAIN AND BAR ARE LUBRICATED

4. To check the lubricating system, switch on the pole pruner and hold it with the guide bar and chain above some light coloured paper such as newspaper. A steadily increasing stain caused by oil spray shows the lubricating system is working.

**Note:** Chain bar oil may leak if the tool is left for long periods. This is normal. If the tool is to be left unused for an extended time, drain the oil from the tool. Refill before use.

### 4. PREPARATION

#### Adjusting the telescope length

1. To unlock the telescopic tube lock, twist it in a clockwise direction while pointing the chain away from the user.

   **Note:** The locking and unlocking directions are indicated on the locking collar.

2. Pull out the telescopic tubes to suit the required working height.

3. To lock in the desired position, twist the telescopic tube lock in a counter-clockwise direction.

#### Adjusting the Rear Handle

1. Press the two pivoting handle releases, one each side and adjust the angle of the handle up or down to any of 4 positions.

#### Adjusting the Auxiliary Handle

1. (a) Open the handle lever and set the required (b) tilt of the auxiliary handle, close to lock into position.

2. (a) Open the mounting bracket lever and (b) slide the auxiliary handle into the required position, close to lock into position.

#### Adjusting the Lubricating System

1. Remove the chain bar oil cap.
2. Fill the tank with chain bar oil.
3. Refit cap and clean any oil spillage.
4. Always fill oil tank when the oil level is below the minimum mark on the oil level window.

**WARNING:** NEVER START WORK UNLESS THE CHAIN AND BAR ARE LUBRICATED

4. To check the lubricating system, switch on the pole pruner and hold it with the guide bar and chain above some light coloured paper such as newspaper. A steadily increasing stain caused by oil spray shows the lubricating system is working.

**Note:** Chain bar oil may leak if the tool is left for long periods. This is normal. If the tool is to be left unused for an extended time, drain the oil from the tool. Refill before use.

**IMPORTANT:** ONLY USE OIL THAT IS EXPRESSLY LABELLED “CHAIN BAR OIL”.
5. INSERTING & REMOVING THE BATTERY

### Adjusting the Pruner Head

#### Pivoting the Pruner Head

1. Press the two pivoting head releases, one each side and adjust the angle of the pruner head up or down to any of 7 positions.

#### Adjusting the Pruner Head 90°

1. Pull the lock button to the right then rotate the pruner head 90° clockwise

**Note:** Keep the pruner head pressed against the motor head when rotating.

2. The pruner head will lock onto the motor head and is then secured in place.

**Note:** The Lock Button will "CLICK" back to the left (original position) when the pruner head is correctly secured in place.

### Attaching the Shoulder Strap

1. Fasten to the shoulder strap holder on the main tube.

2. Wear the shoulder strap so that it lies over the left shoulder.

### Installing a Battery into the Pole Pruner

1. Align the ribs of the battery with the recess below the handle

2. Slide the battery in so that it clicks into place.

### Removing a Battery from the Pole Pruner

1. Press and hold the battery release tab to release the battery.

2. Slide the battery out.
6. SWITCHING ON/OFF

Switching On

1. Hold the pruner firmly with both hands.

2. Slide the switch lock (a) to the front with your thumb and hold, then squeeze the trigger switch (b).

3. The chain will now be running ready to make a cut. Release the switch lock (a).

Switching Off

3. Release the trigger switch. The chain and motor will quickly stop.

APPLICATIONS

• Limbing is the process of removing the branches from a fallen tree. Check the direction in which a branch will bend before cutting it. Always cut on the opposite side to the bending direction so that the guide bar is not pinched in the cut. For large limbs that cannot be removed in one cut, make an initial cut from the bent side and finish by sawing from the opposite direction. Do not remove limbs that are supporting the fallen tree on the ground until the tree has been cut into lengths.

• Pruning is the removal of a limb or branch from a standing tree.

Sawing Techniques

• When removing branches, hold the pruner at an angle ranging from a maximum 60° to horizontal in order to avoid being struck by a falling branch.

• At the end of the cut, the weight of the pruner suddenly increases for the user, because it is no longer supported on the branch. There is the risk of losing control of the pruner.

• Saw off the lower branches on the tree first. By doing so, it is easier for the cut branches to fall to the ground.

• Only pull the pruner out of the cut with the chain running. By doing so, you can prevent it from getting jammed.

• Do not saw with the tip of the guide bar. This could lead to kick back and possible injury.

WARNING!: IF THE CHAIN COMES IN CONTACT WITH A HARD OBJECT, VISUALLY INSPECT THE CHAIN & BAR FOR DAMAGE. IF THE CHAIN OR BAR IS DAMAGED, DO NOT CONTINUE TO OPERATE THE POLE PRUNER.

WARNING!: NEVER USE THE POLE PRUNER WHEN STANDING ON A LADDER OR UNEVEN GROUND. DO NOT OVERREACH. ALWAYS USE BOTH HANDS TO HOLD THE POLE PRUNER.

CAUTION: ALWAYS USE THE BUCKING SPIKES WHEN PERFORMING CUTS WITH THE POLE PRUNER TO AVOID KICKBACK (REFER TO OPERATION SECTION OF MANUAL).

CAUTION: ENSURE APPROPRIATE CARE IS TAKEN WHEN CUTTING ABOVE SHOULDER HEIGHT.
MAINTENANCE

**WARNING:** BEFORE CLEANING YOUR POLE PRUNER, CARRYING OUT ANY MAINTENANCE PROCEDURE OR TROUBLESHOOTING, MAKE SURE THAT THE MOTOR IS OFF AND THE BATTERY REMOVED TO PREVENT ACCIDENTAL STARTING.

**CAUTION:** ALWAYS WEAR GLOVES WHEN HANDLING THE CHAIN AS IT IS VERY SHARP AND CAN CUT YOU WHEN IT IS NOT MOVING.

Maintaining the guide bar

1. Remove any sawdust from the guide bar, including the groove.
   Oil and sawdust combine and emit a burning smell during operation if the blade is not regularly cleaned.
2. Make sure that the oil port is not clogged. Grease the nose sprocket at the tip of the guide bar.
3. Check for oil leakage and loose fastenings, especially those securing the handles and the guide bar.
4. Reverse the guide bar every 8 working hours to ensure uniform wear. Check the guide rails frequently and if necessary remove burrs and square up the rails using a flat file.

**Chain Sharpening**

Chain File: 3.96mm (5/32")
Chain Pitch: 9.53mm (3/8")
Chain Gauge: 1.3mm (0.050")

Sharpen the chain regularly to maintain optimum performance of the saw. Signs of a dull chain are:
- The sawdust becomes powder-like
- Extra force is required to execute a cut
- The cut does not track in a straight line
- Increased vibration

Sharpen each cutter using a round 3.96mm (5/32") chain file. Keep the file level with the top plate of the tooth. Always use outward strokes and maintain a 30° angle between the chain and file. After sharpening, the cutters must all have the same width and length. After every 3–4 uses get an authorised repair centre to professionally sharpen your chain. They have the special tools necessary to ensure the correct cutting angles and depths.

Troubleshooting Guide

The table below contains a list of fault symptoms and explains what you can do to remedy the problem if your equipment fails to work properly. If the problem still persists after working through the list, please contact your nearest service workshop.

<table>
<thead>
<tr>
<th>Fault</th>
<th>Possible cause</th>
<th>Remedy</th>
</tr>
</thead>
</table>
| The equipment does not work | - Battery empty  
- Battery is not correctly inserted | - Charge battery  
- Remove battery and insert again |
| Equipment operates intermittently | - Loose connection (external)  
- Loose connection (internal)  
- ON/OFF switch defective | - Consult a specialist workshop  
- Consult a specialist workshop  
- Consult a specialist workshop |
| Saw chain is dry | - No oil in the tank  
- Vent in the oil tank cap is blocked  
- Oil outlet is blocked  
- Chain is blunt  
- Chain is overtensioned | - Top up with oil  
- Clean the oil tank cap  
- Clear the oil outlet  
- Re-sharpen or replace the chain  
- Check the chain tension |
| Chain/guide bar is hot | - No oil in the tank  
- Vent in the oil tank cap is blocked  
- Oil outlet is blocked  
- Chain is blunt  
- Chain is undertensioned  
- Saw teeth point in the wrong direction | - Top up with oil  
- Clean the oil tank cap  
- Clear the oil outlet  
- Re-sharpen or replace the chain  
- Check the chain tension  
- Adjust the chain tension  
- Re-sharpen or replace the chain  
- Replace the chain  
- Refit the chain with the teeth facing in the correct direction |

PROPER USE

Pole-mounted pruner (chainsaw with telescopic handle)

The chain saw mounting kit is allowed to be used only on the supplied motor head. The chainsaw with telescopic handle is designed for lopping off tree branches. It is not suitable for extensive sawing work, felling trees or sawing any materials other than wood.

The equipment is to be used only for its prescribed purpose. Any other use is deemed to be a case of misuse. The user / operator and not the manufacturer will be liable for any damage or injuries of any kind caused as a result of this.

Please note that our equipment has not been designed for use in commercial, trade or industrial applications. Our warranty will be voided if the machine is used in commercial, trade or industrial businesses or for equivalent purposes.

SPARE PARTS

Spare parts can be ordered from the Special Orders Desk at your local Bunnings Warehouse or Homebase store.

**ADDITIONAL INFORMATION**

**Danger!**

**Sound and vibration**

Sound and vibration values were measured in accordance with ISO 22868.

LaA sound pressure level .................. 81.05 dB(A)
KpA uncertainty ................................................. ± 3 dB
LWA sound power level measured ....... 98.23 dB(A)
KWA uncertainty ................................................. ± 3 dB
LWA sound power level guaranteed .... 102 dB(A)

**Wear ear-muffs.**

The impact of noise can cause damage to hearing.

Total vibration values (vector sum of three directions) determined in accordance with ISO 22867.

**Handle under load**

**Vibration emission value ah = 0.947 m/s²**

K uncertainty = 1.5 m/s²

The specified vibration value was established in accordance with a standardized testing method. It may change according to how the electric equipment is used and may exceed the specified value in exceptional circumstances.

The specified vibration value can be used to compare the equipment with other electric power tools.

The specified vibration value can be used for initial assessment of a harmful effect.

**Keep the noise emissions and vibrations to a minimum.**

- Only use appliances which are in perfect working order.
- Service and clean the appliance regularly.
- Adapt your working style to suit the appliance.
- Do not overload the appliance.
- Have the appliance serviced whenever necessary.
- Switch the appliance off when it is not in use.
- Wear protective gloves.

**ADDITIONAL SAFETY INSTRUCTIONS**

We pay a great deal of attention to the design of every battery pack to ensure that we supply you with batteries which feature maximum power density, durability and safety. The battery cells have a wide range of safety devices. Each individual cell is initially formatted and its electrical characteristic curves are recorded. These data are then used exclusively to be able to assemble the best possible battery packs.

Despite all the safety precautions, caution must always be exercised when handling batteries. The following points must be observed at all times to ensure safe use.

**Safe use can only be guaranteed if undamaged cells are used. Incorrect handling can cause cell damage.**

**Important:** Analyses confirm that incorrect use and poor care are the main causes of the damage caused by high performance batteries.

**For EU countries only**

Never place any electric power tools in your household refuse.

To comply with European Directive 2012/19/EC concerning old electric and electronic equipment and its implementation in national laws, old electric power tools have to be separated from other waste and disposed of in an environment-friendly fashion, e.g. by taking to a recycling depot.

**Recycling alternative to the return request:**

As an alternative to returning the equipment to the manufacturer, the owner of the electrical equipment must make sure that the equipment is properly disposed of if he no longer wants to keep the equipment. The old equipment can be returned to a suitable collection point that will dispose of the equipment in accordance with the national recycling and waste disposal regulations. This does not apply to any accessories or aids without electrical components supplied with the old equipment.

The reprinting or reproduction by any other means, in whole or in part, of documentation and papers accompanying products is permitted only with the express consent of the ISC GmbH.

Subject to technical changes

This consignment contains lithium-ion batteries.

In accordance with special provision 188 this consignment is not subject to the ADR regulations. Handle with care. Danger of ignition in case of damage to the consignment package. If the consignment package is damaged: Check and if necessary repackage. For further information contact: 0049 1807 10 20 20 66 (fixed network 14 ct/min, mobile phone max. 42 ct/min) Outside Germany charges will apply instead for a regular call to a landline number in Germany.
