3 YEAR REPLACEMENT WARRANTY

WARRANTY

All of our products undergo strict quality checks to ensure that they reach you in perfect condition. In the unlikely event that your device develops a fault, please contact our service department at the address shown on this guarantee card. You can also contact us by telephone using the customer service number shown. Please note the following terms under which guarantee claims can be made:

1. These warranty terms regulate additional warranty services, which the manufacturer mentioned below promises to buyers of its new products in addition to their statutory guarantee claims are not affected by this guarantee. Our guarantee is free of charge to you.

2. The warranty services only covers defects due to material or manufacturing faults on a product which you have bought from the manufacturer mentioned below are limited to either the rectification of said defects on the product or the replacement of the product, whichever we prefer. Please note that our devices are not designed for use in commercial, trade or professional applications. A guarantee contract will not be created if the device has been used by commercial, trade or industrial business or has been exposed to similar stresses during the guarantee period.

3. The following are not covered by our guarantee:
   - Damage to the device caused by a failure to follow the assembly instructions or due to incorrect installation, a failure to follow the operating instructions (for example connecting it to an incorrect mains voltage or current type) or a failure to follow the maintenance and safety instructions or by exposing the device to abnormal environmental conditions or by lack of care and maintenance.
   - Damage to the device caused by abuse or incorrect use (for example overloading the device or the use or unapproved tools or accessories), ingress of foreign bodies into the device (such as sand, stones or dust, transport damage), the use of force or damage caused by external forces (for example by dropping it).
   - Damage to the device or parts of the device caused by normal or natural wear or tear or by normal use of the device.

4. Your Product is guaranteed for a period of 36 months from the original date of purchase and is intended for DIY (Do It Yourself) use only. Warranty excludes consumable parts. Guarantee claims should be submitted before the end of the guarantee period within two weeks of the defect being noticed. No guarantee claims will be accepted after the end of the guarantee period. The original guarantee period remains applicable to the device even if repairs are carried out or parts are replaced. In such cases, the work performed or parts fitted will not result in an extension of the guarantee period, and no new guarantee will become active for the work performed or parts fitted. This also applies if an on-site service is used.

IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO THE PLACE OF PURCHASE WITH YOUR REGISTER RECEIPT.

Please refer to the restrictions of this warranty concerning wearing parts, consumables and missing parts as set out in the service information in these operating instructions.

### 1. BEFORE USE

#### Items Supplied

Please check that the article is complete as specified in the scope of delivery. If parts are missing, please contact our service centre or the sales outlet where you made your purchase at the latest within 5 working days after purchasing the product and upon presentation of a valid bill of purchase. Also, refer to the warranty table in the service information at the end of the operating instructions.

- Open the packaging and take out the equipment with care.
- Remove the packaging material and any packaging and/or transportation braces (if available).
- Check to see if all items are supplied.
- Inspect the equipment and accessories for transport damage.
- If possible, please keep the packaging until the end of the guarantee period.

#### Danger!

The equipment and packaging material are not toys. Do not let children play with plastic bags, foils or small parts. There is a danger of swallowing or suffocating!

#### Proper Use

The equipment is designed for cutting lawns and small areas of grass in private and hobby gardens.

Equipment designed for use in private and hobby gardens is regarded as unsuitable for use in public facilities, parks and sports centers, along roadways, or in agriculture and forestry. The operating instructions as supplied by the manufacturer must be kept and referred to in order to ensure that the equipment is properly used and maintained.

**Important. This equipment must not be used for composting purposes (shredding) as this could result in injury or damage to property.**

The equipment is to be used only for its prescribed purpose. Any other use is deemed to be a case of misuse. The user / operator and not the manufacturer will be liable for any damage or injuries of any kind caused as a result of this.

Please note that our equipment has not been designed for use in commercial, trade or industrial applications. Our warranty will be voided if the machine is used in commercial, trade or industrial businesses or for equivalent purposes.

#### Caution!

**Residual risks**

Even if you use this electric power tool in accordance with instructions, certain residual risks cannot be ruled out. The following hazards may arise in connection with the equipment’s construction and layout:

1. Lung damage if no suitable protective dust mask is used.
2. Damage to hearing if no suitable ear protection is used.
3. Health damage caused by hand-arm vibrations if the equipment is used over a prolonged period or is not properly guided and maintained.
**2. ASSEMBLY**

**WARNING!** ENSURE THE TOOL IS DISCONNECTED FROM THE POWER SUPPLY BEFORE PERFORMING ANY OF THE FOLLOWING OPERATIONS.

**Fitting the Safety Guard**

1. Turn the trimmer upside down and place the safety guard over the cutting head.
2. Rotate the guard into the correct position and secure with the supplied screws.
3. Align the edging wheel with the screw holes at the underside front of the safety guard and secure with the remaining supplied screws.

**WARNING!** NEVER USE THE LINE TRIMMER UNLESS THE SAFETY GUARD IS PROPERLY FITTED AND SECURED.

**Fitting the Secondary Handle**

1. Place the adjustable handle onto the line trimmer so that the holes align.
2. Pass the bolt through the handle and screw the locking knob loosely onto bolt.
3. Rotate the handle into the most comfortable position and tighten the locking knob.

**3. ADJUSTMENTS**

**Adjusting the Working Height**

1. Loosen the Telescopic Shaft Collar by rotating in a clockwise direction.
2. Adjust the Telescopic Shaft up or down to the appropriate height.
3. Tighten the Telescopic Shaft Collar once adjustment is complete.

**Rotating the Cutting Head**

1. Pull the Rotating Head Collar and turn the Telescopic shaft 180° anticlockwise.
2. Release the Collar to lock in place.

**Note:** The head will only rotate in one direction.

**Adjusting the Cutter Head Angle**

1. Depress the Head Angle Release Button.
2. Move the Telescopic Shaft into the desired position and release the Button.
4. CONTROLS

**CAUTION:** TO REDUCE THE RISK OF ELECTRICAL SHOCK, A RESIDUAL CURRENT DEVICE (RATED 30mA OR LESS) SHOULD BE USED.

**On/Off Trigger**
1. To turn on squeeze the on/off trigger.
2. To turn off release the on/off trigger.

**WARNING:** THE LINE TRIMMER MAY RUN FOR A FEW SECONDS AFTER IT HAS BEEN SWITCHED OFF. LET THE MOTOR COME TO A COMPLETE STANDSTILL BEFORE SETTING THE TOOL DOWN.

5. USING THE LINE TRIMMER

**WARNING:** MAKE SURE THAT THE WORK AREA IS FREE OF ROCKS, DEBRIS, LINES AND OTHER FOREIGN OBJECTS.

**Using the Line Trimmer**

**CAUTION:** DO NOT CONTINUALLY TAP, BUMP OR HOLD THE SPOOL HOLDER ON THE GROUND AS THIS MAY RESULT IN DAMAGE TO THE SPOOL HOLDER OR OVERLOAD THE UNIT.

1. Wear eye protection and stout shoes at all times while operating the line trimmer.
2. Start cutting nearest the mains power source and work away to make it easier to avoid the extension cord.
3. Do not push the line against hard material (rocks or concrete) during cutting as this may result in damaged line.
4. Never use the line trimmer without its safety devices.
5. Do not cut grass that is wet (The best results are achieved on dry grass).
6. Wait until the line trimmer reaches full speed before cutting the grass.
7. Keep the line trimmer away from hard objects in order to avoid unnecessary wear to the line.
8. Several passes will be required to cut long grass.
9. To prevent the line from breaking ensure you approach the edge/object slowly.
10. Watch out for kickbacks in the event of impact with hard objects.
11. After finishing the cutting operation, keep the head close to ground level, release the switch and allow the motor to come to a complete standstill. Unplug and place the line trimmer on the ground.
12. Keep ventilation slots of the trimmer clean at all times. Periodically clean out the grass from the cutting head and the rim of the safety guard to ensure efficient operation at all times.

**Lengthening the Line**
This line trimmer is equipped with Automatic Line Advancement which automatically feeds the additional line to the correct length as it wears down.

- To automatically advance the line, allow the line trimmer to come to a complete stop. When the head comes to a stop, a “Click” can be heard. The line will have automatically advanced approximately 5cm. If a longer length of line is required, repeat the automatic line advancement instruction.
- To manually advance the line, ensure the line trimmer is off and turn the line trimmer upside down. Push the tab on the side of the cutter head and then pull on the end of both pieces of line protruding from the cutter head.

**Cutting Modes**
The Cutter Head should be adjusted so that the trimmer can be held in this position comfortably as shown.

**Edging Mode**

**Trimming Mode**
6. TRIMMING AND EDGING

Trimming
Move the line trimmer from side to side as you walk forward, holding it at an angle of approx. 30° (Light cuts are better than heavy cuts as they allow the cut grass to fall away from the cutting head).

Edging
Place the edging wheel along the ground and roll the line trimmer along the edge of the path.

NOTE: DO NOT CUT GRASS WHEN WET. (THE BEST RESULTS ARE ACHIEVED ON DRY GRASS.)

NOTE: BEFORE STORING FEED EXTRA CUTTING LINE TO AVOID LOOSING THE LINE COMPLETELY.
MAINTENANCE

WARNING: ENSURE THE TOOL IS DISCONNECTED FROM THE POWER SUPPLY BEFORE PERFORMING ANY OF THE FOLLOWING OPERATIONS.

Replacing the Spool and Line Assembly

1. While holding the tabs on either side of the spool, remove the spool cover.

2. Remove the empty spool from the housing and any dirt or grass.

3. Insert the rewound spool and rotate until it is seated.

4. Unclip the ends of the cutting lines and guide them through the eyelets so that the line protrudes approx. 11cm.

5. Push the cover onto the housing until it snaps into place.

Winding New Line Onto Empty Spool

1. Feed 15mm of 1.5mm or 1.6mm x 4m cutting line into the hole in each section of the spool.

2. Wind the 2 lines neatly onto each section of the spool in the direction of the arrows on the spool.

3. Place the end of the line into the clips on the outside of the spool. Leaving about 11cm protruding from the spool.

4. Re-seat the spool as described in steps 3 - 5 of the “Replacing the Spool and Line Assembly” section.

Note: If the cutting lines protrude beyond the trimming blade, cut them off so that they just reach the blade.

Note: Ozito Industries will not be responsible for any damage or injuries caused by the repair of the line trimmer by an unauthorised person or by mishandling of the line trimmer. This tool is designed for DIY use - use in commercial or industrial environments will void the warranty.

* Not necessarily included in the scope of delivery!

In the effect of defects or faults, please register the problem on the internet at www.isc-gmbh.info. Please ensure that you provide a precise description of the problem and answer the following questions in all cases:

• Did the equipment work at all or was it defective from the beginning?
• Did you notice anything (symptom or defect) prior to the failure?
• What malfunction does the equipment have in your opinion (main symptom)? Describe this malfunction.
**ADDITIONAL INFORMATION**

**Danger!**

**Sound and vibration**

Sound and vibration values were measured in accordance with EN 60745.

- $L_{pa}$ sound pressure level: 93 dB(A)
- $K_p$ uncertainty: 3 dB
- $L_{wa}$ sound power level: 93.2 dB(A)
- $K_w$ uncertainty: 1 dB

**Wear ear-muffs.**

The impact of noise can cause damage to hearing. Total vibration values (vector sum of three directions) determined in accordance with EN 28662-1.

Front handle:

- Vibration $aw = 5.10 \text{ m/s}^2$
- Vibration Uncertainty $K = 2 \text{ m/s}^2$

The specified vibration value was established in accordance with a standardized testing method. It may change according to how the electric equipment is used and may exceed the specified value in exceptional circumstances. The specified vibration value can be used to compare the equipment with other electric power tools.

The specified vibration value can be used for initial assessment of a harmful effect.

**Keep the noise emissions and vibrations to a minimum.**

- Only use appliances which are in perfect working order.
- Service and clean the appliance regularly.
- Adapt your working style to suit the appliance.
- Do not overload the appliance.
- Have the appliance serviced whenever necessary.
- Switch the appliance off when it is not in use.
- Wear protective gloves.

**For EU countries only**

Never place any electric power tools in your household refuse.

To comply with European Directive 2012/19/EC concerning old electric and electronic equipment and its implementation in national laws, old electric power tools have to be separated from other waste and disposed of in an environment-friendly fashion, e.g. by taking to a recycling depot.

Recycling alternative to the return request:

As an alternative to returning the equipment to the manufacturer, the owner of the electrical equipment must make sure that the equipment is properly disposed of if he no longer wants to keep the equipment. The old equipment can be returned to a suitable collection point that will dispose of the equipment in accordance with the national recycling and waste disposal regulations. This does not apply to any accessories or aids without electrical components supplied with the old equipment.

The reprinting or reproduction by any other means, in whole or in part, of documentation and papers accompanying products is permitted only with the express consent of the ISC GmbH.

Subject to technical changes

For production in the EU countries only.
**ELECTRICAL SAFETY**

**WARNING!** When using mains-powered tools, basic safety precautions, including the following, should always be followed to reduce risk of fire, electric shock, personal injury, and material damage.

Read the whole manual carefully and make sure you know how to switch the tool off in an emergency, before operating the tool.

Save these instructions and other documents supplied with this tool for future reference.

Before you connect the equipment to the mains supply make sure that the data on the rating plate are identical to the mains data.

This tool is double insulated therefore no earth wire is required.

**GENERAL POWER TOOL SAFETY WARNINGS**

**WARNING!** “Read all safety warnings, instructions, illustrations and specifications provided with this tool.” Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference. The term “power tool” in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1. Work area safety
   a. Keep the work area clean and well lit. Cluttered or dark areas invite accidents.
   b. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
   c. Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

2. Electrical safety
   a. Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.
   b. Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
   c. Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
   d. Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Do not abuse the cord. Damage to the cord increases the risk of electric shock.
   e. When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of an RCD reduces the risk of electric shock.
   f. If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) rated at 30mA. Use of an RCD reduces the risk of electric shock.

3. Personal safety
   a. Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.
   b. Always use eye protection. Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injury.
   c. Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.
   d. Remove any adjusting key or wrench before turning the power tool on.
   e. Never touch the power tool or the work area with wet hands.
   f. Do not operate the power tool if the switch does not turn it on and off.
   g. Use personal protective equipment. Always wear eye protection.
   h. Properly maintain the power tool. Always follow the manufacturer’s instructions for maintenance.
   i. Keep the power tool and all tools clean for best and safest performance. Regularly inspect your power tools for damaged components and take care of them immediately.
   j. Use the correct power tool for the job. Don’t force the tool or attachment to do a job that it was not designed to do.
   k. Use the right accessories. Use only accessories recommended by the manufacturer for your model. Accessories that are suitable for one tool may create a hazard when used with another tool.
   l. Keep the handle dry, clean, and free from oil and grime. Slippery handles increase the risk of losing control.

4. Dangers of electric shock
   a. Switch off the motor and pull out the power plug when you are not using the grass trimmer, when you leave the trimmer or before you clean or carry out maintenance work.
   b. Before you change the equipment to the mains supply make sure that the data on the rating plate are identical to the mains data.
   c. Be sure to hold the grass trimmer away from your body when it is switched on!
   d. Always wear suitable clothing to protect your head, hands and feet from injury. Wear a helmet, goggles or visor, high boots or ear plugs!
   e. Use the grass trimmer only as described in these directions for use and always hold it vertical to the ground. All other positions are dangerous.
   f. Always take the necessary precautions when changing the nylon line. This will ensure that the safety of the power tool is maintained.
   g. Make the air vents clear of dirt.
   h. Never attempt to cut grass that is not growing on the ground. For example, do not try to cut grass growing on walls, rocks, etc.
   i. The working radius of the grass trimmer is only as wide as the specified on the plate.
   j. The correct power tool and the correct attachment are the essential for the grass trimmer to work correctly. Failure to observe this instruction will not only create a potential hazard, it will also result in the loss of your rights under the warranty.
   k. The equipment continues to rotate after the motor is switched off. The equipment does not start.
   l. Keep the handle dry, clean, and free from oil and grime. Slippery handles increase the risk of losing control.
   m. Always make sure of your footing while working. Be careful when stepping backwards. Risk of stumbling!
   n. Distractions can cause you to lose control.
   o. Do not use the power tool if the switch does not turn it on and off.
   p. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
   q. Always wear suitable clothing to protect your head, hands and feet from injury. Wear a helmet, goggles or visor, high boots or ear plugs!
   r. Use the grass trimmer only as described in these directions for use and always hold it vertical to the ground. All other positions are dangerous.
   s. Always make sure of your footing while working. Be careful when stepping backwards. Risk of stumbling!
   t. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
   u. Keep the handle dry, clean, and free from oil and grime. Slippery handles increase the risk of losing control.
   v. Keep the handle dry, clean, and free from oil and grime. Slippery handles increase the risk of losing control.
   w. Keep the handle dry, clean, and free from oil and grime. Slippery handles increase the risk of losing control.

**LINE TRIMMER SAFETY WARNINGS**

Read the complete operating manual with due care.

Acquaint yourself with the controls and how to use the tool.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

Important!

For safety reasons the grass trimmer is not to be used by children, young people under 16 years of age, or any other persons who are not acquainted with these directions for use.

Keep the instruction manual in a safe place for later use.

- Examine the grass trimmer each time before you use it. Do not use the trimmer if any safety devices are damaged or worn.
- Never cut safety devices out of operation.
- Do not use the grass trimmer if the cables are damaged or worn.
- The equipment continues to rotate!
- Follow the instructions on the rating plate.
- Keep the grass trimmer away from the line cutting device.
- Never use the grass trimmer without a guard.

CAUTION! The guard is vital for your safety and for the safety of others, and it is also essential for the grass trimmer to work correctly. Failure to observe this instruction will not only create a potential hazard, it will also result in the loss of your rights under the warranty.

- Never try to stop the cutter (nylon line) with your hands. Wait until it stops by itself.
- It is imperative to use only the original nylon line. Never use metal wire instead of the nylon line.
- Beware of injuring yourself on the line cutting device.
- If the supply cord is damaged, it must be replaced by an electrician or a power tool repairer in order to avoid a hazard.
- Never double insulation does not take the place of normal safety precautions when operating this tool. The insulation system is for added protection against injury resulting from a possible electrical insulation failure within the tool.
- When using an extension lead on a reel, always unwind the lead completely. Use of an extension lead not suitable for the power input of the tool or which is damaged or defective may result in a risk of fire and electric shock.
