

HG7500 Gas Hob Pan Sizes for the Dual Burner

The minimum pan size for the dual burner on the left of your HG7500, specified on page 10 of your instruction manual, has been updated.

If just using the inner crown of this burner, the pan must not be less than 20cm diameter. If the outer crown is in use the minimum pan size remains at 26cm diameter.

This instruction supersedes the figures quoted in the manual.

Using just the inner crown (without the outer one) provides a gentle, more controllable, heating option for cooking delicate foods in large pans.

Extensive testing has shown this gives the optimum balance between performance and economy.
